NS Optimum Ltd

has purchased,

165t CO₂e

of verified carbon credits to rebalance the organisation's operational greenhouse gas emissions for **2022**.

NS Optimum Ltd has invested in carbon credits from the following projects:

Larimar Wind Farm Project – Dominican Republic

Project Highlights:

2,467,667 tCO₂ emissions avoided per year.

Decreases emissions of sulphur oxides (Sox), nitrogen oxides (NOx), carbon monoxide (CO).

Project helps diversify and grow regional employment opportunities by creating full time operating roles for local people at the farms.
